

AN INITIATIVE OF

the de Beaumont Foundation + Kaiser Permanente

# 2019 REPORT METHODOLOGY

This report by CityHealth, an initiative of the de Beaumont Foundation and Kaiser Permanente, details which of the nation's 40 largest cities have nine evidence-based policies in place that experts say help residents lead healthier lives and make communities thrive. Cities were awarded nine policy-specific medals, according to the quality and strength of the laws in place. CityHealth also awarded each city an overall gold, silver, bronze, or no medal, according to their performance in the assessment.

The report is designed to identify which cities are leading the way on policies shown to improve people's health and quality of life. To see the full results of the assessment, please visit [cityhealth.org](http://cityhealth.org). Below is a detailed description of the methodology for this report.

It should be noted that some cities are limited by state laws from changing policies that are part of this assessment. This practice is called preemption.

## OVERALL MEDAL STATUS

This research was conducted in partnership with the Center for Public Health Law Research at Temple University's Beasley School of Law.

# POLICY MEDALS

## Affordable Housing

Inclusionary zoning is an affordable housing policy tool that requires developers to set aside a portion of housing units for low- and moderate-income residents.

Cities' housing markets and the quality of housing stock vary across the United States, which means the best policy approaches will be comprehensive commitments to ensuring affordable, safe, quality options for all. While inclusionary zoning works best in “hot” markets to promote affordable options alongside new development, it's an important policy for all cities to consider before demand outstrips supply.

Our assessment of inclusionary zoning laws includes information about city-specific laws, along with the relevant county- and state-level laws passed by June 1, 2019. For the purpose of this assessment, the existence of an impact fee demonstrates an inclusionary zoning policy. Housing impact fees require a developer to pay a fee in exchange for a building permit approval without receiving any benefit or incentive—developers can waive or reduce this fee if they construct affordable housing.

### Measuring big cities' inclusionary zoning laws

CATEGORY	BRONZE	SILVER	GOLD
City has a mandatory inclusionary zoning law	Yes	Yes	Yes
Law requires program evaluation	Yes	Yes	Yes
Applies to projects of at least 10 units or less		Yes	Yes
Requires at least 20% of total projects are affordable units			Yes

## Complete Streets

Complete Streets policies balance people's needs and safety across all forms of transportation, including walking, biking, public transit and cars. From street light-

ing to bike lanes to crosswalks, these policies ensure that all residents have safe, convenient ways of getting around and staying active—regardless of their age or ability. Although some cities may have standalone transportation policies that share the ultimate goals of a complete streets program, only comprehensive programs within a singular area of the law were scored here.

Our assessment of complete streets includes information about city-specific laws, along with relevant county- and state-level laws passed by May 1, 2019.

### Measuring big cities' complete streets policies

CATEGORY	BRONZE	SILVER	GOLD
City has a complete streets policy	Yes	Yes	Yes
Policy requires compliance	Yes	Yes	Yes
Policy accommodates pedestrians, bicyclists, motorists, and public transit vehicles	Yes	Yes	Yes
Policy explicitly accommodates all ages		Yes	Yes
Policy explicitly accommodates all abilities		Yes	Yes
Policy assigns a department to oversee implementation			Yes
Policy requires development of performance measures			Yes

## Earned Sick Leave

Earned sick leave laws reduce the spread of contagious illnesses, increase employment and income stability, and save cities money in health care costs.

Earned sick leave laws require employers to allow people to take paid time off for illnesses or injury for themselves or their family members. The quality of cities' policies is linked to how many family members and what size employer are covered by the law, as well as the number of hours people can earn.

Our assessment of earned sick leave laws includes information about city-specific laws along with relevant county- and state-level laws passed by August 1, 2019.

### Measuring big cities' earned sick leave laws

CATEGORY	BRONZE	SILVER	GOLD
City has an earned sick leave law	Yes	Yes	Yes
Employee can use earned sick leave to care for family members*		Yes	Yes
Employee can use earned sick leave for domestic violence recovery		Yes	Yes
Minimum amount of earned sick leave time employee can earn		≥40 hours	≥48 hours
Smallest business size covered under earned sick leave law			1 employee

\* Note: For cities to receive full credit, the earned sick leave law must cover spouses, children, parents, grandparents, grandchildren, siblings, and domestic partners. Cities covering fewer categories of family members receive a lower rating.

## Food Safety

Policies requiring food establishments to publicly post food safety inspection “grades” contribute to informing consumers, reducing foodborne illness rates, and

cutting down on health care costs. For this assessment, voluntary ratings, or those only displayed on the internet, were deemed out of scope, and therefore received no medal. Inspection reports without a score and/or binary pass/fail systems were also deemed beyond the scope. This assessment specifically addresses policies where an inspection report with a score is required to be posted near the entrance of the restaurant.

Our assessment of restaurant inspection policies includes information about city-specific laws, along with relevant county- and state-level laws passed by August 1, 2019.

### Measuring big cities' restaurant inspection policies

CATEGORY	SILVER	GOLD
City uses a mandatory rating system to disclose the restaurant inspection results to the public	Yes	Yes
Restaurants must visibly post on-site ratings/grades	Yes	Yes
Restaurants must post ratings/grades outside before potential customer enters		Yes

## Healthy Food Procurement

Policies that ensure healthy food options are available on public property aid city residents in making smart decisions that will help them achieve and maintain a healthy weight. A city that has a healthy procurement policy applicable to all city contracts for food and drinks served at city venues, meetings, and events earned a gold medal. Otherwise, cities earned silver or bronze medals based on their healthy vending machine policies.

Our assessment of healthy procurement policies includes information about city-specific laws, along with relevant county- and state-level laws passed by May 1, 2019.

### Measuring big cities' healthy procurement policies

CATEGORY	BRONZE	SILVER	GOLD
City has a procurement policy mandating nutrition standards	Yes	Yes	Yes
Policy applies to all city contracts			Yes
More than 75% of food and beverages must meet standards		Yes	
If the policy only applies to vending machines - More than 50% of food and beverages must meet standards	Yes		

## High-Quality, Accessible Pre-Kindergarten

Done right, all children benefit from early childhood education, regardless of family income or zip code. High-quality Pre-K improves children's school readiness and success: they enter school better prepared and are less likely to repeat a grade. Long-term benefits include higher high-school graduation rates, lower rates of crime and teen pregnancy, higher lifetime earnings, and better health outcomes.

CityHealth's assessment of Pre-K quality is based on the National Institute of Early Education Research's 10 research-based quality standard benchmarks, along with an assessment of the level of enrollment in all of the city's local and state-funded Pre-K programs. These benchmarks are consistent with what research suggests as minimums for highly effective programs. Data are based on assessments as of September 30, 2019.

### Measuring big cities' high-quality, accessible Pre-K programs

CATEGORY	BRONZE	SILVER	GOLD
Meets 8 out of 10 quality benchmarks for a Pre-K program*		Yes	Yes
Over 30% of 4-year old children enrolled in Pre-K programs	Yes		Yes

\* Note: The quality benchmarks for a Pre-K program for the 2019 CityHealth update include: early learning and development standards; curriculum supports; teacher has a bachelor's degree; specialized training in Pre-K; assistant teacher has CDA or equivalent; staff professional development; class size of 20 or fewer; staff-child ratio of 1:10 or better; vision, hearing & health screening & referral; and a continuous quality improvement system.

## Safer Alcohol Sales

These are policies that put cities in charge of the location and practices of alcohol retailers. Neighborhoods with high concentrations of alcohol sales are linked to more drinking and higher rates of violence and driving under the influence. The U.S. Centers for Disease Control and Prevention linked 44% of all U.S. homicides with drinking. Policies that govern where, when and how alcohol may be sold in a neighborhood can reduce crime, increase safety, and decrease spending on health care and criminal justice.

CityHealth's assessment of alcohol sales laws includes information about city-specific laws, along with the relevant county- and state-level laws that were passed by May 1, 2019.

### Measuring big cities' alcohol sales control policies

CATEGORY	SILVER	GOLD
City has a law that applies to <i>all</i> alcohol sales, addresses public health and safety, and authorizes the city to close an alcohol retailer for failing to comply with the law.		Yes
City has a law that applies to <i>some</i> alcohol sales (such as only new retailers, or only retailers selling for off-premises consumption, e.g. grocery or convenience stores), addresses public health and safety, and authorizes the city to close an alcohol retailer for failing to comply with the law.	Yes	

## Smoke-Free Indoor Air Laws

Everyone should have access to clean air. Smoke-free indoor air policies protect non-smokers from the harmful effects of tobacco and reduce smokers' consumption of tobacco at the same time. Tobacco use is the largest preventable cause of death.

Our assessment of smoke-free indoor air policies includes information about city-specific laws, along with the relevant county- and state-level laws that were passed by August 1, 2019.

### Measuring big cities' smoke-free indoor air policies

CATEGORY	BRONZE	SILVER	GOLD
Total number of met criteria*	Total 2 out of 4 criteria listed below	Total 3 out of 4 criteria listed below	Total 4 out of 4 criteria listed below
1. Smoking is banned in non-hospitality workplaces, including workplaces, child care, and long-term care facilities			Yes
2. Smoking is banned in public places			Yes
3. Smoking is banned in restaurants			Yes
4. Smoking is banned in bars			Yes

\* Note: For a bronze medal, a city must meet any 2 of the 4 criteria. For a silver medal, a city must meet any 3 of the 4 criteria. For a gold medal, a city must meet all 4 of the criteria.

## Tobacco 21

Tobacco use remains the number one preventable cause of death and disease in America. Policies that raise the minimum legal age to 21 for the sale of tobacco

products can reduce the number of young people using them. These laws greatly reduce the risk for addiction, disease, and premature death. The assessment also addresses whether the Tobacco 21 law covers e-cigarettes and vapor products.

Our assessment of Tobacco 21 laws includes information about city-specific laws, along with the relevant county- and state-level laws that were passed by August 1, 2019.

### Measuring big cities' Tobacco 21 policies

CATEGORY	GOLD
Must be at least 21 to purchase tobacco products in the city	Yes
The age restriction explicitly applies to e-cigarettes and vapor products	Yes

CityHealth, an initiative of the de Beaumont Foundation and Kaiser Permanente, advances a package of proven policy solutions that will help millions of people live longer, better lives in vibrant, prosperous communities. CityHealth will regularly evaluate cities on the number and strength of their policies. <http://www.cityhealth.org/>
