CityHealth: Smoke Free Indoor Air

This codebook describes the variables in a dataset that examines variation in state, county and city laws on smoke free indoor air laws. This dataset includes the 75 largest cities, their respective counties, 32 states and the District of Columbia. This dataset is cross-sectional, capturing currently effective law valid through June 1, 2025.

There are three standard variables in every MonQcle dataset. They are:

JURISDICTION:

This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

EFFECTIVE DATE:

This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

VALID THROUGH DATE:

This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

AN IMPORTANT NOTE ABOUT THE STATISTICAL DATA PAGE:

This codebook should be used in conjunction with the statistical data extract that can be downloaded from the dataset homepage by clicking on the Data button. The value labels defined below will correspond with the coded responses you will see on the Statistical data page. Coding questions that are not answered will show as a period (".") in the Excel cell. Coding questions can be intentionally not answered, such as when a state does not have a law, and the coder therefore leaves the remaining coding answers as unanswered.

Questions

Question 1:	Does the city have a smoke-free indoor air policy?
Question Type:	Binary - mutually exclusive
Variable Name 1:	**SFIA_Policy**
Variable Values:	0, 1
Value Label:	0 = No
